EnergyCAP: Overview

Purpose	By the end of this job aid, you will be able to describe at a high level what EnergyCAP is and how it works.

EnergyCAP is a powerful energy management software application for managing utility bill data.

Information stored in EnergyCAP includes:
- Buildings
- Meters
- Accounts
- Utility bills
- Interval data
- Vendors and Rate Schedules
- Users

You can complete the following tasks in EnergyCAP:
- Create your property and building hierarchy
- Enter your accounting hierarchy representing your organization's cost centers
- Enter your utility bills

EnergyCAP is then able to show you your property's energy usage at different intervals and can help pinpoint cost savings.
